**Harrisonburg Winter Conference**

**February 18, 2020**

***Exploring Soil Health***

## **Featured Speakers**

- **Russell Hedrick** —  
Hickory, North Carolina farmer
- **Daniel Austin** —  
Franklin County, Virginia farmer
- **Dr. Michael Flessner** —  
Weed Scientist, Va Tech
- **Josh Walker & Richard Fitzgerald** —  
Manure Injection Update

**United States  
Department of  
Agriculture**

**Natural Resources Conservation Service**

## Featured Speakers

**Daniel Austin** is a farmer in the foothills of the Blue Ridge Mountains, between Ferrum and Rocky Mount, VA. He grows a diverse mix of grain, on 170 acres, that he retails in

his seed and feed business. His focus is on no-till farming systems with an emphasis on soil health and profitability.

**Dr. Michael Flessner** is an assistant professor and extension weed science specialist in the School of Plant and Environmental Sciences at Virginia Tech. His research and extension program focuses on solving weed management challenges currently facing the Commonwealth, with emphasis placed on sustainable and economic solutions. Using cover crops for weed management is one integrated solution to the herbicide resistant weed problem. Dr. Flessner will share his research using cover crops to suppress weeds.

## Plus

- ◇ Trade Show
- ◇ Networking with Local farmers & agricultural consultants
- ◇ Certified Crop Advisor credits
- ◇ Nutrient Management Planner certification credits
- ◇ Low Volatile Dicamba Training

**Russell Hedrick** is a first generation farmer from Hickory, North Carolina. He started farming on 30 acres in 2012. Russell now produces corn, soybeans and specialty grains on nearly 1,000 acres.

With guidance from the NRCS Russell started out with no-till and cover crops primarily to avoid erosion. Continued experience with no-till and multispecies cover cropping has reaped multiple benefits: improved yields, reduced water stress, less capital outlay, a buildup of organic matter and improved soil health.

**Josh Walker** and **Richard Fitzgerald** will review the latest programs promoting manure injection. Josh is the field technician for the Headwaters SWCD. He has worked diligently to secure funding for manure injection equipment and funding support to increase the adoption of the technology. Richard is a consulting agronomist who spearheaded the initial manure injection research in the Shenandoah Valley.
